

CE 0476 D.B.M. AQUAGLY

STERILE GLYCERIN 10%

Pre-filled syringe with sterile glycerin 10% for Foley catheters  
Sterile - Latex-free - Disposable

EN

CE 0476 D.B.M. AQUAGLY

GLYCERIN 10% STERILE

Siringa pre-riempita con glicerina al 10% sterile per cateteri vesicali  
Sterile - Senza lattice - Monouso

IT

QUALITATIVE AND QUANTITATIVE COMPOSITION  
GLYCERIN 100 mL  
Excipients: WFI q.s. to 1000 mLDEVICE TYPE  
Sterile, ready-to-use medical device - Class IIa.  
Medical Device not subject to a medical prescriptionPACKAGING  
PCG08NA1: 10 mL disposable pre-filled syringe, filled to 10 mL, with Luer Lock adapter, individually packaged in a PET/PP paper pouch.  
PCG08NE1: 10 mL disposable pre-filled syringe, filled to 10 mL, with Luer Lock adapter, individually packaged in a PET/PP paper pouch and in a second aluminum pouch.  
PAG08NA1: 10 mL disposable pre-filled syringe, filled to 10 mL, with Luer Slip adapter, individually packaged in a PET/PP paper pouch.  
PAG08NE1: 10 mL disposable pre-filled syringe, filled to 10 mL, with Luer Slip adapter, individually packaged in a PET/PP paper pouch and in a second aluminum pouch.

As for all types of packaging, only the contents and the outside of the syringe are sterile. The syringe and the product are most-heat sterilized in autoclave.

The volume reported on the label refers to the filling volume of the syringe. The graduated scale reported on the label of the primary packaging (syringe) has no measuring function.

INTENDED USE  
This Medical Device is exclusively intended to be used for balloon inflation in Foley catheters.

By adopting an aseptic procedure, D.B.M. Aquagly can be used on the sterile field.

SPECIAL INSTRUCTIONS AND PRECAUTIONARY MEASURES  
• Do not administer intravenously directly. Do not use the product for purposes other than its intended use.

- Do not use the product if the packaging is open or damaged, if the syringe is not perfectly intact or if the cap is so damaged that the syringe leaks.
- Do not use the product if the solution is not colourless or it contains particulate matter.
- Once opened, the device must be used immediately and disposed of after use.
- Single-use only. Dispose of any partially used product, the reuse of which may cause cross contamination between patient and operator.
- Do not re-sterilize.
- Keep out of reach and sight of children.

## CONTRAINDICATIONS AND SIDE EFFECTS

No contraindications. No side effects are known if the solution is used according to its intended use.

## INSTRUCTIONS FOR USE

Disposable device for a single patient.

In order to ensure a sterile application of the product, the health-care worker must comply with the procedures provided for by the health-care institution, applying an aseptic technique to the entire procedure.

Check the expiry date reported on the sealing side of the pouch.

The operator sanitario deve rispettare le procedure previste dal proprio istituto, adottando una tecnica asettica.

Controlare la correttezza della posizione del cappuccio della siringa e la trasparenza della soluzione.

Remove the protective cap, making sure that no contact contamination of the syringe Luer cone occurs.

Connect the syringe to the balloon inflation channel on the catheter, taking care to avoid any contamination through contact with the Luer cone of the syringe.

Slowly inject the amount of solution for a volume suitable to the correct and effective anchoring of the balloon in the Foley catheter, according to the procedure adopted by your institution.

After use, dispose of the empty syringe and any unused solution volumes in accordance with the national regulations in force.

## SHELF-LIFE

3 years in an intact pouch.

## STORAGE

Store the syringes tightly sealed, away from direct light and heat sources, at a temperature between + 5 °C and + 30 °C. Do not freeze. The expiration date refers to the product in its intact packaging and correctly stored. Do not use the Medical Device after the expiration date.

The syringes are sterile, made of polypropylene, and do not contain any latex.
